

# Indoor Sports Series

## Features and Benefits

### 1. HID Suspended Indirect Lighting

#### Indirect Lighting System

Provides high levels of glare-free illumination and outstanding uniformity.

#### Weep Holes

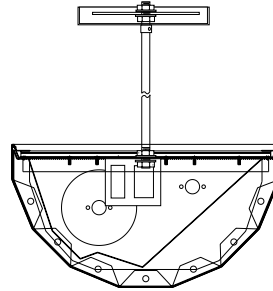

Provided to eliminate condensation in the luminaire.

#### Construction

18 gauge stainless steel for maximum protection from the chlorine and moisture laden pool atmosphere.

#### Optional

Available with corner and intersection modules for continuous row mounting.

### 2. Handball and Racquetball Fluorescent Ceiling Downlighting

#### Unsurpassed Design and Fabrication Standards

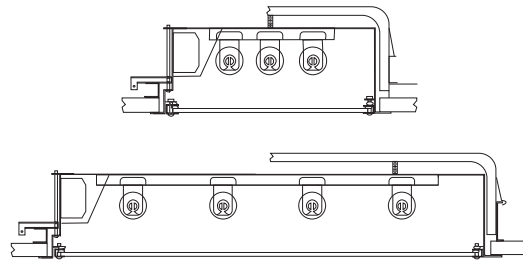

These products utilize proven shockproof and impact resistant features such as locking lampholders and inverted tempered glass diffusers set in flush steel frames. These features are required to withstand impact and not affect ball flight.

#### Superior Lamp Characteristics

Fluorescent lamps provide low glare and less noise compared to point sources, thus ensuring player comfort. Fluorescent lamps are switchable and dimmable more efficiently than HID.

#### Optional

Asymmetric Reflector.

### 3. HID Wall and Ceiling Mount Indirect or Off Set

#### Adherence to Close Tolerances

Our unsurpassed design and fabrication standards result in a sealed product to protect the electrical components from pool environments.

#### 20-Gauge Stainless Steel

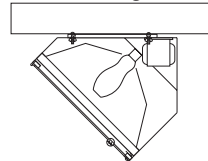

The housing and door frame features:

- SS Construction - provides the best resistance to corrosion available to the specifier.
- Staked, stainless steel continuous piano hinge door.
- Captive, stainless steel fasteners.

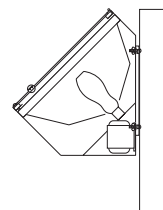

#### Superior Area Lighting

HID lighting aimed at an angle from perimeter of the pool area, provides a simplified lighting installation. This provides easy maintenance of fixtures.
